

MCAT

Which Prep Program Is Best for You?

Hyperlearning[®] MCAT Classroom Courses

Like the MCAT itself, our *Hyperlearning* MCAT classroom course is thorough, demanding, and rigorous. Be prepared to work hard.

- 1. Proven Results** An independent study shows that our students score an average of 30 on the MCAT, and 96% of our students would recommend us to others.*
- 2. Specialist MCAT Instructors** One of the biggest differences between The Princeton Review and other test-prep companies is the quality and number of our MCAT instructors. Your course will be led by a team of 3–5 dynamic instructors, each an expert in his or her specific subject.
- 3. Complete Methodology and Curriculum** With 105 live classroom hours and 42 interactive class sessions, plus full-length testing with personal analysis, we are different because we deliver both aspects of test prep required to master the MCAT: the content material as well as our own strategy and techniques.

MCAT Tutoring Programs

Private Tutoring Some students benefit more from one-on-one instruction. Our private tutoring programs will help you improve your score and get you into your top-choice medical school by focusing on the areas that are crucial to your success.

Master and Premier Tutoring Princeton Review Master and Premier tutors are a small group of specialized instructors who bring exceptional skill and experience to their chosen subjects.

Small Group Tutoring This program combines the peer interaction of our prep courses with the flexibility of a private tutor. Small Group Tutoring matches one dedicated MCAT subject-specific instructor with you and two other MCAT students who have similar goals and abilities.

Wherever you are,
whatever you need,
we're there.

Our MCAT prep
programs are created
with you in mind.
They're flexible and
convenient, and
result in higher scores.
Guaranteed.*

To better serve you,
we're constantly
adding new MCAT
test-prep schedules and
locations. We also offer
Verbal Accelerator, as
well as preparation for
the DAT and OAT.

*Visit PrincetonReview.com for details on our guarantee. **Result not typical

“The course was a very thorough review of the MCAT, and some of the information covered was new to me. I also think the practice tests prepared me very well for test day. I could not have gotten my scores without Hyperlearning.”

—Greg P.

Starting Total: 21

Final: 37

Improvement: 16**

Greg now attends USC Medical School.

Medical School Admissions Stats

How do you measure up against your competition?

Medical School	Avg. GPA	Avg. P	Avg. V	Avg. B	Avg. Essay	% Accepted
Boston University	3.56	10.48	9.72	10.84	P	4.3
